DEPLOYMENT AGREEMENT & APPROVAL

This agreement provides for the authorized use and deployment of AmbuGo's ambulance-prioritization system by the Punjab Police, Traffic & Road Safety Wing, across 121 designated traffic intersections for a one-year period commencing August 21, 2026.

1. Background and Pilot Evaluation (Phase 0)

- A three-month pilot of AmbuGo was conducted across **31 traffic intersections** in Mohali, Punjab, concluding in June 2026. The pilot recorded an approximately **32% reduction** in ambulance emergency response time compared to scenarios without AmbuGo system implemented. It also evaluated the system's compatibility with existing traffic-signal infrastructure and operational coordination with ambulance movements.
- Following these results, the expansion of AmbuGo has been approved, covering **121 designated intersections** under Phase 1.

2. Scope of Deployment (Phase 1)

- **Duration:** August 21 2026 to August 22 2027 (12 months)
- **The Phase 1 deployment provides for:**
  - Integration of AmbuGo's ambulance-routing and selective signal-priority software with existing traffic-control infrastructure across **121 traffic intersections.**
  - Support for the prioritization of approximately **700 or more ambulance movements daily**, depending on operational demand and system availability on the selected 121 intersections.
  - Joint monitoring of ambulance response times, system performance, and traffic conditions throughout the deployment period.

3. Implementation

AmbuGo's software and associated intellectual property remain owned by its

co-developers, Mrityunjay Gupta and Jasnam Singh Arora. The Punjab Police Traffic Wing will oversee the deployment, while the Development Team will provide software integration, maintenance, and technical support.

4. Deployment Approval

Based on the reported results of Phase 0, the above framework records the proposed one-year Phase 1 deployment of AmbuGo across 121 intersections, coordinated between Punjab Police and the AmbuGo Development Team.
